# About CV Indo Nafaz Group

We are a reliable sugarcane molasses supplier and exporter from Indonesia, providing high-quality molasses for animal feed, bioethanol, and industrial applications. Our molasses is sourced from certified sugar mills, supported by a stable supply chain, strict quality control, and complete export documentation to serve global molasses buyers with consistent quality and competitive prices.

# Company Commitment

**Delivering consistent and high-quality sugarcane molasses** that complies with international quality standards and buyer specifications

**Ensuring reliable supply volumes** supported by a stable and traceable supply chain from certified sugar mills

**Maintaining accurate product specifications** through strict quality control and regular laboratory analysis

**Providing on-time and efficient export shipments** with complete and compliant export documentation

**Building long-term partnerships with global buyers** based on trust, transparency, and mutual growth

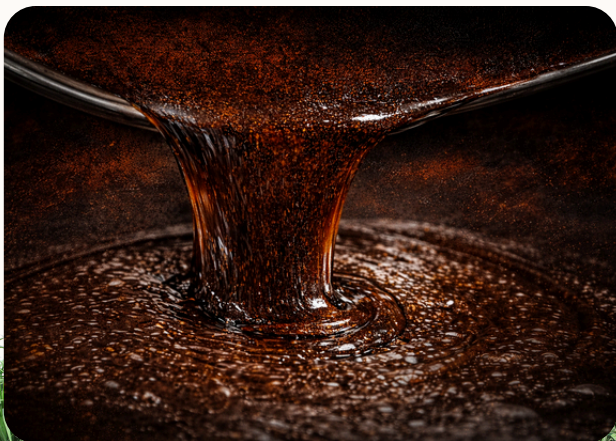

**Offering competitive pricing and flexible shipment options** to meet diverse market requirements

**Supporting sustainable and responsible utilization of sugarcane by-products** to add value across global industries

# Our Strength

## Consistent Quality

Controlled specifications with regular laboratory testing

## Reliable Supply Chain

Stable sourcing from verified sugar mills

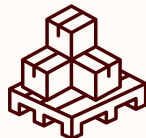

## Competitive Pricing

Direct sourcing ensures cost efficiency

## Export-Ready Operations

Complete export documentation and compliance

## Flexible Packaging & Shipment Options

Bulk, ISO Tank, or Drum shipment available

# Supply Flow

## Sugarcane Mills

Molasses is sourced from selected and certified sugarcane mills, ensuring consistent production quality, traceable origin, and stable supply capacity.

## Quality Inspection

Each batch undergoes quality inspection and laboratory analysis to verify key parameters such as Brix, total sugar content, moisture, ash, pH, appearance, and odor in accordance with buyer and international standards.

## Storage

Approved molasses is stored in clean and controlled storage tanks to maintain product integrity, prevent contamination, and ensure quality consistency prior to shipment.

## Export Loading

Molasses is loaded under supervised procedures into bulk vessels, ISO tanks, or drums, ensuring accurate volume, secure handling, and compliance with export safety standards.

# Our Molasses

## Product Description

Sugarcane molasses is a natural by-product of sugar production, containing residual sugars, minerals, and organic nutrients. It is widely utilized as an economical and efficient raw material for various industrial applications.

## Typical Technical Specifications

*(Specifications can be adjusted based on buyer requirements)*

- Brix : 80–85%
- Total Sugar : approx. 48–52%
- Moisture : approx. 18–22%
- Ash Content : approx. 8–10%
- pH : 5.5 – 6.5
- Color : Dark brown to black
- Odor : Typical molasses aroma, free from sour or off-odor

## Available Grades :

- Industrial Grade
- Feed Grade
- Food Grade

# Export Ready

## Packaging & Shipment Options

- Bulk shipment (vessel or tanker)
- ISO Tank
- Drum (200–300 kg)
- Flexibag (upon request)

**Port of Loading** : Indonesia

**Shelf Life** : Up to 12 months under proper storage conditions

## Export Documentations :

- Certificate of Analysis (COA)
- Material Safety Data Sheet (MSDS)
- Certificate of Origin (COO)
- Phytosanitary Certificate (if required)
- Commercial Invoice & Packing List
